Quality for Your Testing

We are here!

We had thought it was a great idea to locate Hong Kong as our Asia-Pacific headquarter.
Since 2009 Anauqa has begun to explore Asian markets, such as Hong Kong, Taiwan, Singapore and Malaysia.
In 2012 we were lucky to meet the professional high purity solvents distributor in China and then we began to enter China market.
Now we are clear China is Asian heart, our future and our hope.
After searching the markets, we do know our customers are here.
Go to China! Go to Asia! We are here!

In China we find an interesting thing: we had thought HPLC grade solvents could meet instrument testing applications.
China labs are equipped global state-of-art instruments, such as UPLC, LCMS, GCMS not only HPLC units.
Anaqua products are also state-of-art manufactured and can meet these applications.

Our premium solvents, Ultra-Gradient grade, can meet modern HPLC applications.
UPLC,LCMS, GC-Headspace grade solvents and Karl Fischer Reagents are also our great recommendations.

We are at your side! Call us and let us service you!

QUALITY

Quality

Anaqua Chemicals Supply pays more attention to product quality, which meets the latest worldwide standards and requirements for various applications.

IMPORTS

Imports

Anaqua Chemicals Supply insists on taking state-of-art techniques and manufacturing perfect products for your testing in every China laboratories.

VALUABLE

Valuable

Our high-valuable and high-performance chemicals always encourage Anaqua' s people to develop high quality products for our valued customers' latest demands.

SERVICE

Service

Experienced distributors and nationwide sales network are offering you our best services and fast delivery to all customers in China.

UPLC Grade Solvents

For UPLC, UHPLC, MPLC, UPLC-Mass, LC-MS, LC-MS-MS
HPLC, HPLC-Gradient

Ultra-high purity
Ultra-low impurity peaks during gradient applications
Excellent far UV scan
Ultra low ion background
Packed under nitrogen
Submicron ultra fine filtration

Based upon recent development of UPLC/UHPLC techniques, specially combined applications with high sensitive detectors, such as Mass, PDA, ELSD, CAD, etc., ultra low limits and efficient molecular structure analysis are applied in bio-engineering and pharmaceutics.

Modern laboratories are equipped with advanced instruments UPLC/UPLC-MS, compatible mobile phases from Anaqua Chemicals Supply are suitable for such high resolution and high sensitive analysis. Anaqua is one of suppliers of such grade solvents in the world.

Kit of UPLC grade solvents and reagents is available.

Ultra-Gradient Grade Solvents

For Gradient-HPLC, HPLC

Ultra-high purity
Ultra-low impurity peaks during gradient applications
Excellent far UV scan
Packed under nitrogen
Submicron ultra fine filtration

Ultra-Gradient grade is specially developed for gradient applications, where some small impurity peaks are normally happen with normal HPLC grade solvents.
Ultra-Gradient grade is the highest level in entire HPLC grades, also with highest performance.
